

A Commitment to *Excellence*

We take pride to introduce ourselves as one of the promising manufacturers, suppliers of Rotogravure cylinders, which are widely used in flexible Packaging & Printing, textile, pharmaceuticals, vinyl and many industries for their durability, superior quality and high performance. Manufactured in compliance with industry standards, our range is stringently checked and tested using sophisticated machines. Further, to sustain our capabilities and serve the clients in more effective manner, we have employed a team of expert professionals. Their valuable experience and expertise assist us in customizing the range as per the needs of the clients. In addition our manufacturing unit allows us in delivering both large and small order within specified time frame. Quality products line, cost effective pricing, transparent deals and customization facility have helped us in serving huge client base in South India.

Product Portfolio

All our products are manufactured using optimum quality raw material produced from reputed vendors. These products are extensively used in printing industries. Further, we also specialize in customizing these products as per the industrial need and specification of the clients. Stringently checked and tested using advanced machines like chemical testing machines, roughness testing and hardness testing machines, these are offered at cost effective prices.

Our product line comprises

- Rotogravure Cylinders
- Joint Less Anilox Rollers
- Embossing Rollers

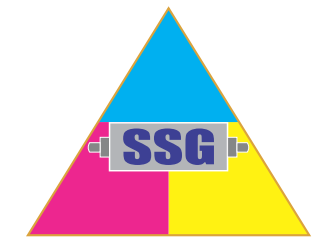

Sailent Features

- » High performance
- » Durability
- » Uniform Print quality
- » Easy to install and use
- » Minimal Maintenance
- » Precision designed
- » Longer shelf life

Our Team Comprises

- Packaging Design Specialists
- Technical Engineers / Supervisors
- Sales and Marketing Professionals
- Warehouse and logistic Personnel
- Skilled and semiskilled workforce

We owe our success to the unending efforts of the team of professionals, which helps us in successfully catering to the clients with high quality and performing products. Well versed in their respective domain, our professionals support us in designing and developing products in compliance with industry standards. Apart from manufacturing and quality testing, our professionals also carry out extensive research for continual up-gradation of the products and process. Further, we also organize various training sessions to make our professionals abreast with the changing trends and new developments of the industry.

Sri Shakti Gravure's

Now Sri Shakti Gravure's is with strong background of conventional, chemical roto Gravure Cylinder making getting footstep ahead for electronics cylinder manufacturing unit in prime location of bangalore.

We are facilitated with new Electro Mechanical equipment & Technical resource.

Pre-Press & Design Facility :

Sri Shakti Gravure pre-press & Design department is equipped with all higher end Scanner, Digital Printer (Epson Pro) specialised software like Esko Art pro, Adobe Creative Suite & Corel Draw to fulfill of customer's print pack requirements.

CYLINDER PREPARATION FOR GALVANIC PROCESS

Nickel plating

Mechanically & dynamically balanced base shells are dipped in formulated nickle solution. This nickel layer gives affinity to copper plating for next galvanic process.

Copper Plating

Galvanic process in which pure copper nuggets perfectly drawn with electrolysis process to deposit on base shells. Ensure for desired hardness & grain structure followed to next stage of polishing & finishing.

Polishing & Finishing of Copper Cylinders :

Copper cylinder's are cut & polished by stone polishing machine to get desired circumstance & good surface roughness for best print quality

Engraving

K5 series HELL engravers stylus hinting on finishing copper surface reproduce required edge cells form & finally customer's bunch of satisfied cells in mind.

Chrome Plating

Chrome layer adhere engraved copper cylinder to strengthen image cells for withstand in printing process by inks & chemicals

Proofing

The engraved chrome layered, finalized cylinders are actually proofed as printing process inks, substrate requirement to check & Verify engraving authentications.

Quality Assurance

Reproduced cylinders are checked physically proofed for means of text, image & colour. Quality assured cylinders are despatched for actual print process. The quality cylinders we reproduce, printers derived for best packaging material which on shelf in market gives better value of our effort.
